

ARBUTUS ANALYZER VIRTUAL INTRODUCTORY TRAINING

LEARNING OBJECTIVES

This five-day course, delivered in half-day segments, is a comprehensive introduction to Arbutus Analyzer, designed for novice users who want to learn the fundamentals needed to start using Analyzer. Through this thorough introduction and practice exercises, you will learn how to effectively use Analyzer to accomplish your data analytic objectives. Key topics include:

- Identify gaps and control failures that may expose operational or compliance risks.
- Detect exact and near-duplicate transactions within large datasets.
- Reconcile data across multiple systems and data sources.
- Analyze transactional data for unusual patterns, outliers, and anomalies.
- Join and compare data from disparate sources to support audit testing and validation.
- Aggregate and stratify data to identify trends, exceptions, and areas of risk.
- Compare data snapshots to detect changes over time.
- Calculate and evaluate elapsed times to identify overdue, delayed, or otherwise exceptional transactions.

METHODOLOGY

This is a group internet based, instructor-led course. The course incorporates hands-on activities which enhances the learning process by seeing how typical audit/data analysis tests are conducted in Arbutus Analyzer.

REGISTRATION

To register, go to <https://www.arbutussoftware.com/en/arbutus-live-virtual-courses>.

ADDITIONAL INFORMATION

Field of Study: Computer Software & App

Prerequisites: Minimal or no experience with Arbutus Analyzer

Program Level: Basic

Advanced Preparation: None

CPE: Participants will earn 24 CPE credits upon completion of the course
