

Arbutus ConnectPlus

Trusted Analytics for Excel & Power BI Users

Arbutus ConnectPlus enables organizations to deliver cleansed, analytics-ready data directly into Excel, Power BI, and other reporting applications, without manual exports, duplicate data preparation, or complex integration projects. By extending the power of Arbutus Analytics into the tools users already know, ConnectPlus helps organizations improve reporting accuracy, accelerate analytics adoption, and reduce manual effort.

Why Organizations Choose ConnectPlus

Deliver Trusted Analytics

Provide business users with governed, analytics-ready data prepared through Arbutus workflows and procedures.

Reduce Manual Effort

Eliminate repetitive spreadsheet preparation, reconciliation, and manual data manipulation.

Extend Analytics to More Users

Allow Excel and Power BI users to benefit from advanced analytics without needing to learn a new platform.

Support Real-Time Reporting

Enable dashboards and spreadsheets to connect to refreshed results generated by Arbutus analytics workflows.

Leverage Existing Investments

Continue using familiar tools such as Excel and Power BI while strengthening analytics and data quality.

Simplify Data Access

Connect disparate and legacy data sources into a consolidated, trusted analytics environment.

Who ConnectPlus Is For

Excel-Centric Teams

Business users can work with:

- » Cleansed and consolidated data
- » Advanced analytic outputs
- » Refreshed datasets
- » Legacy and disparate data sources

all from within Excel.

Power BI & Dashboard Users

Enable reporting and dashboard teams to:

- » Access trusted analytics-ready datasets
- » Consume refreshed analytics results
- » Improve reporting consistency
- » Reduce manual data preparation

IT & Data Teams

Support analytics initiatives with:

- » Simplified deployment options
- » Centralized analytics governance
- » Agile data preparation capabilities
- » Lightweight integration architecture

Key Benefits

Benefit	Business Impact
Governed analytics delivery	More consistent reporting
Cleansed & consolidated data	Improved data quality
Familiar user experience	Faster adoption
Refreshed analytics outputs	Timelier insights
Legacy data connectivity	Broader data access
Reduced spreadsheet manipulation	Lower operational risk

How ConnectPlus Works

1. Prepare Data with Arbutus

Use Arbutus to access, cleanse, combine, and analyze data from multiple sources.

2. Connect to Analytics Projects

Map ConnectPlus to Arbutus projects and datasets.

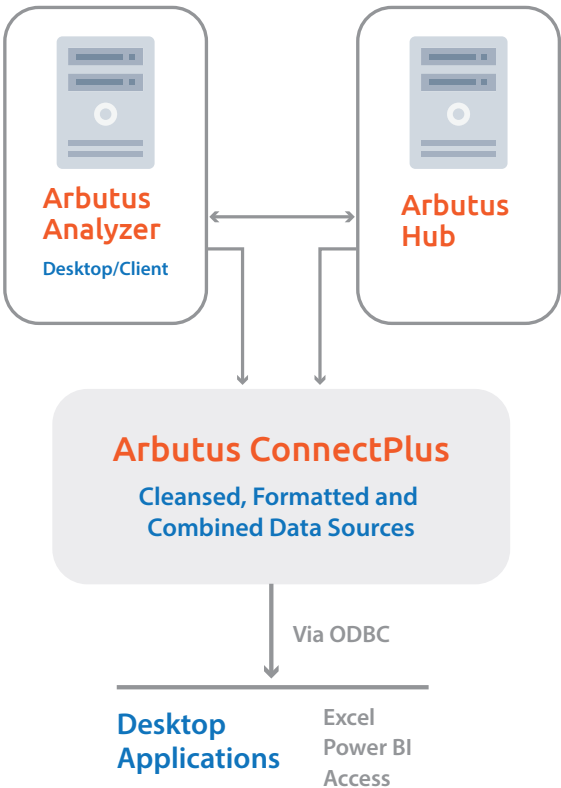

3. Deliver Data into Business Tools

Provide analytics-ready data directly (via ODBC) into:

- » Excel
- » Power BI
- » Access
- » Other ODBC-compatible applications

4. Refresh & Reuse

Users continue working within familiar applications while benefiting from refreshed analytics outputs and governed data delivery.

Typical Use Cases

» Audit Analytics Distribution

Deliver analytics results directly to audit teams and business stakeholders.

» Financial Reporting

Support trusted reporting with cleansed and consolidated datasets.

» Continuous Monitoring

Enable refreshed dashboards and recurring analytics outputs.

» Compliance & Risk Reporting

Improve visibility into exceptions, trends, and control monitoring activities.

» Legacy Data Modernization

Extend legacy and disparate data into modern reporting environments.

Security & Governance

ConnectPlus is designed to support secure and controlled analytics delivery:

- » Read-only access to source data
- » No disruption to operational systems
- » Controlled distribution of trusted analytics outputs
- » Centralized analytics governance
- » Desktop or server deployment options

What Customers Value

"We now have better data quality and results in our existing reporting applications."

"Our employees don't need to learn a new tool to get better analytics."

"We've expanded analytics access without increasing adoption challenges."

Modernize Reporting with Trusted Analytics

Arbutus ConnectPlus helps organizations extend advanced analytics into Excel and Power BI environments - faster, simpler, and with greater confidence.
